# Acesonic® KM-360

Professional DSP Audio Mixer

One of the world's most powerful 1U digital karaoke mixers you will ever find in the market. Despite its powerful features, the KM-360 is designed to be easy to use for any user.

### Feedback Eliminator

KM-360's real-time feedback eliminator processor was designed to provide state-of-the-art feedback elimination processing, while maintaining a simple control interface.

### Vocal Eliminator

Has a powerful vocal eliminator processor that can take out up to 90% of vocals from any regular audio CD.

### Music Volume Auto Leveling

Auto leveling is designed to reduce the music or microphone volume to a safe level protecting your amplifier and speakers.

### Digital Effect Processor

Powerful built-in Reverb and Echo Effects that can dramatically increase the quality of your performance.

- 5 Microphone Inputs with 2 XLR Input Connectors • S/PDIF Digital Input • RS-232 Serial Port PC Interface • User Lock-Down Mode
- Subwoofer Signal Control • Center Speaker and Rear Speakers Signal Control • Music and Microphone Balance • Auto-Source Detection
- 4 Preset Memory Recall Buttons • XLR Line Outputs

### Multiple-Channel Surround Sound Configuration

#### EMX-Series Powered Mixer Features:

- **Integrated Solutions for Superior Live Sound** - Experienced musicians, performers, speakers, and club operators know the importance of a high-quality sound system with the right features and performance to deliver their sound.
- **Features For Superior Sound and Convenience Great Yamaha Sound** - Yamaha is a leader in the field of professional live sound for a very good reason: we deliver the sound and performance that the pros demand. The EMX-series powered mixers are no exception. They're built at the same standards of sonic performance and rugged reliability that makes Yamaha the first choice for live sound applications from schools to stadiums around the globe.
- **SPX Digital Effects** - The EMX212S, EMX312SC, and EMX512SC all feature a selection of 16 top-quality Yamaha SPX effects - including reverb, echo, chorus, flanger, phaser, and even distortion - that can add the final touch to your live presentation. Yamaha SPX digital effects are widely recognized as being some of the finest available, and the effects provided in the EMX mixers live up to that reputation.
- **Built-in Graphic EQ** - Graphic equalizers are provided for both the main and monitor channels, so you can effectively control feedback or tailor the sound to match the room and program material.
- **Stand-by Mode** - When you're done with a set simply engage the stand-by mode to mute all mono channels while leaving the 2-track inputs active for background music playback while you're taking your break.
- **Feedback Channel Locating (FCL) System** - FCL System indicator LEDs at the top of each channel light if the corresponding channel goes into feedback, so you won't have to fumble around searching for the channel that needs adjustment.
- **12 Inputs** - All three mixers in this series offer a total of 12 input channels - four for monaural microphone (incl. Phantom Power) or line input, plus four pairs that can function either as monaural microphone inputs or stereo line inputs - providing you with a versatile mix of input capabilities for a wide range of applications. If you need only microphone inputs you can use up to eight mic channels.
- **High Power For Main and Monitor Speakers** - These powered mixers certainly don't skimp on power. From the EMX212S with 200 watts per channel to the EMX512SC with a solid 500 watts per channel, there's a power configuration to suit any application and venue. All models also feature a power mode switch that lets you use the two power channels as a stereo amplifier, or you can use one of the channels for the main speaker(s) and the other to drive monitors with a separate monitor mix set up via the channel MONITOR controls.

## YAMAHA MG102C

10-Input Stereo Mixer

Whether you have a mixing applications that involves only a few channels, or up to 32 inputs with substantial signal routing versatility, Yamaha's M<sup>T</sup>G-series offers a console that will give you the capacity, control, and performance you deserve.

### SMOOTH 60-MILLIMETER FADERS & ILLUMINATED CHANNEL ON SWITCHES

While the MG102C feature rotary faders, channel and master level control on all other models is accomplished via reliable, high-performance 60-millimeter linear faders that provide smooth, noise-free operation. When you have more than a few channels the direct visual indication of relative level settings can be an important advantage. Models with linear faders also feature illuminated channel ON switches that can be used to individually add or remove channels from the mix without having to change the positions of the channel faders.

### Features & Specifications:

- High Quality mic preamp • 3 buses (Stereo + Aux) • HPF(CH1-6), 3 band EQ (Ch 1-6), COMP(CH1-2) • With up to four mic/line inputs or up to four stereo inputs, the MG mixer can simultaneously connect to a wide range of devices: microphones, line-level devices, stereo synthesizers, and more. • Compression increases the overall level without introducing distortion by compressing excessive peaks in the signals from microphones and guitars. • You can use the AUX SEND jack to feed the signal sent to an external signal processor, and then return the processed stereo signal through the RETURN jack.

**\$99<sup>99</sup>**

MIXING AMPLIFIERS

**CROWN** INTELLIGENT POWER. UNLEASHED.

# Drivecore Power Amplifiers

## XLS Series with Integrated DriveCore™ Technology

The XLS Series of power amplifiers from Crown define the standard for live sound systems with unmatched performance, technology, and affordability. This high-performance line consists of four models each providing enormous power and flexibility thanks to the integrated DriveCore™ Technology, PureBand™ Crossover System and Peakx™ limiters. And weighing in at only 10 lbs or less, they provide the ultimate in lightweight portability.

### Integrated DriveCore™ Technology

Class D amplifiers are notable for extraordinarily high efficiency and being well suited for driving difficult reactive loads such as subwoofers. However, their performance can suffer impaired performance on marginal and unstable AC line supplies. To overcome this obstacle, Crown engineers developed DriveCore™ Technology – a proprietary hybrid analog-digital integrated circuit (IC) developed with Texas Instruments that drives the "front end" of the Class D output stage.

### Advanced Switched-Mode Power Supply

This advanced power supply is highly efficient and optimized for maximum power transfer from the AC line through the Class D output stage to the loudspeakers. A benefit to this is substantial weight reduction when compared to older 60Hz transformer-based power supplies.

### PureBand™ Crossover System

The PureBand™ Crossover System in the XLS Series adds an enormous amount of flexibility and performance to any system. With this system, the crossover frequency is completely variable allowing the choice of any crossover point between 50Hz and 3kHz on 1/12 octave centers.

### Peakx™ limiters

Peakx™ limiters provide the ultimate in performance and protection for your entire system. This advanced algorithm was specifically developed and tuned to work with this amplifier and power-supply to achieve higher SPL will less audible artifacts. This means less distortion, less shutdowns, and maximum safe power delivered to your speakers.

### Features & Specifications:

- XLS High Performance, Lightweight Class D amp weighs less than 11 lbs.
- Integrated PureBand™ Crossover System for better performance and control
- Peakx™ Limiters provide maximum output while protecting your speakers
- XLR, 1/4", RCA inputs provide outstanding flexibility

**VocoPro VP-600 PRO**  
2U 600-Watt Professional Power Amplifier

The 100dB signal to noise ratio on the amplifier insures the clearest audio signal. Both the 1/4" and XLR input jacks offer total versatility in setting up. System failure is the worst nightmare for all the commercial operators, this is why the VP-600 PRO amplifier has a built-in five way protection system to insure proper operation at all times. With features like the 19" rack mountability and the variable speed forced air fan, the VP-600 PRO can be protected in road cases or amp racks without overheating. The VP-600 PRO amplifier outputs 600 watts of power RMS and takes only two rack spaces!

**Big Power with Outstanding Efficiency**

The new P-Series Power Amplifiers deliver solid, professional-quality power in a wide range of configurations designed to suit a variety of applications. In 4Ω bridged mode the P7000S delivers 3200W, the P5000S 2600W, the P3500S 2000W, and the P2500S 1300W. Those on a budget will find the lineup's high power output and affordable prices offer superior quality without putting a strain on allotted funds. Further savings are realized with extremely efficient operation utilizing Yamaha's exclusive EEEngine technology, which keeps operational costs down by significantly reducing AC power consumption and heat generation.

**The Perfect Match for Your Club Speakers**

The new P-Series Power Amplifiers can be used with any loudspeaker system, but if you're using our Club Series speakers they will provide optimum power and performance. In an 8Ω stereo application, power output per P7000S channel is 700W (650W on the 230V model), the P5000S puts out 500W per channel, the P3500S delivers 350W per channel, and the P2500S outputs 250W per channel. This wide selection lets you choose the amplifier that best matches the power handling capabilities of your speaker system. All four models are equipped with independent sweepable high-pass and low-pass filters on each channel so you can optimize output for subwoofer or full range systems.

**Light Weight for Easy Transport and Setup**

Look at the specifications and you'll notice that the P2500S and P3500S are surprisingly light in weight, making transport and setup less of a chore. What is really impressive, however, is the difference in weight per watt when you look at the P5000S and P7000S. The use of an advanced switching power supply makes these two models very lightweight while maintaining superior audio quality.

**Versatile Connectivity**

To provide the most versatile connectivity possible, all four models are equipped with Neutrik speakON\* output jacks and 1/4" output jacks for each channel, in addition to 5-way binding post. Balanced XLR and 1/4" TRS jacks are provided for channel input.

**EEEngine (Energy Efficient Engine) Technology**

Makes more efficient use of AC power by reducing power consumption and heat generation without sacrificing output power or sound quality. When power requirements are low, the system uses a highly efficient current buffer to transparently switch input power on and off as needed. As power requirements increase, an independently responding auxiliary power line supplies additional power as required. Output isn't compromised because the auxiliary power line is driven by the power supply voltage which maintains maximum output to the speaker load.

**YS Processing**

YS Processing (Yamaha Speaker Processing) achieves optimum matching with our popular Club Series loudspeaker systems. This special circuit optimizes output from the power amplifier to match the characteristics of Club Series speaker systems, resulting in extra-smooth highs and enhanced lows.

## UHF-A6

Commercial UHF True Diversity Rechargeable Wireless Microphone System

with **INFRARED SYNC**

### Features

- Commercial grade UHF True Diversity system.
- Multiple systems (up to 50) can be used together allowing up to 100 channels simultaneously.
- Easy-to-Use IR Channel switching function
- Two rechargeable, high-sensitive and durable microphones with LCD indicators.
- Rackmountable

### Receiver

- Frequency Stability: +/- 0.005%
- Image Interference Rate: >80dB
- S/N Ratio: >105dB
- Sensitivity: -107dBm
- T.H.D.: <0.5%
- Audio Output Impedance: 600Ω
- Audio Output Level: -12dB
- Display: LCD

**\$425**

- Frequency Range: 645.250-674.95MHz
- Frequency Preparation: PLL
- Receiver Channels: 100 Individual Channels
- Frequency Response: 15Hz-20KHz
- Maximum Distance: 150M

The UHF-A6 is perfect for any situation where multiple microphones are required where you have to switch channels to avoid interference. This system provides the quality and durability required in venues such as a KTV room, karaoke bar, restaurant, or auditorium.

### Includes

- UHF-A6 Receiver
- 2 Wireless Microphones (Black)
- ¼" Microphone Cable
- 2 Antennas
- 12V AC Power Adapter
- Rackmount Kit

### Transmitter

- Dynamic Range: >110dB
- Frequency Stability: +/- 0.005%

## What is UHF?

### Stands for Ultra High Frequency

UHF is an acronym for a band of radio frequencies often used to broadcast television signals. Wireless microphones, mobile phones and satellite radio also use UHF signals.

### UHF Frequencies

Any radio frequency between 300 MegaHertz (MHz) and 3,000 MHz (or 3 GigaHertz) is considered to be in the UHF signal range. Frequencies immediately below 300 MHz are part of the VHF range.

**Condenser vs DYNAMIC**

Condenser microphones are the most common type of microphones you'll find in recording studios. They generally have a louder output, but are much more sensitive to loud sounds.

Compared to condenser microphones, dynamic microphones are much more rugged. They're also especially resistant to moisture and other forms of abuse, which makes them the perfect choice onstage.

## Ace Karaoke Corp Product Service, Exchange and Return Policy

We will exchange or refund your full purchase price on any unopened karaoke discs within 14 days of the date you received your package. Due to the nature of software sales, copyright laws, and the ability to copy discs; we are not able to provide a refund for any opened/unwrapped discs. Karaoke music is **NEVER** the original music and has been interpreted and recreated by each karaoke manufacturer in the manufacturer's own studios, therefore we cannot guarantee the quality of music, lyrical keys, or graphic components of the media. If you have a special requirement, please call our staff as we can offer recommendations on which discs and brands are better for your specific needs.

### Returning Hardware and Accessories

- 1. Non-Defective Machines, Microphones and Other Hardware.** We will gladly issue a refund within 14 days of your receipt less handling & shipping fee. Please contact our return department for RMA#. Customers will bear all shipping costs for the return of non-defective hardware. If you received free shipping on your order, you will be charged for shipping fee at \$7 + \$1 per pound. **All non-defective returns of hardware will be charged 15% restocking fee per industry standard. If you received free shipping, we will assess the shipping charges additionally.**
- 2. Exchange Defective Hardware.** Please examine your package immediately upon receipt. Please send back the defected item within 14 days of receipt, if we determined the problem is due to manufacturer defect, Ace Karaoke will reimburse your shipping cost up to \$25. Please contact our technical/return department for Return Authorization number (RA#) and for technical trouble - shooting. We will reship you a new unit once we receive your merchandise. **Merchandise initially returned as defective, whose defect cannot be verified, damaged due to human error, or intentional destruction will incur a minimum 15% restock charge as well as any related shipping costs.**
- 3. Exchange.** All replacement systems are shipped via UPS Ground. However, customers have the option of paying for the difference of an expedited shipping method
- 4. No refunds/exchanges on customized items. (e.g. KOD, Unify System). Service Only.**

### Returning Hardware for an Upgrade

1. Within 14 days of delivery if you are not satisfied with the machine and wish to upgrade, please contact our sales department. We will apply the full purchase price of your original purchase (excluding shipping and handling cost) toward the upgrade. The customer is responsible for all shipping costs relating to the upgrade. All returns **MUST be in original condition, subject to approval.**

### Returning Software

- 1. Non-defective software.** Due to copyright laws, we are unable to provide refunds for any opened/unwrapped software. Within 14 days of your package receiving date, we will accept returns of **unopened** software for **store credit only. 15% handling fee will be assessed for the exchange.** Please contact our return department for a return authorization number for the exchange. Customers requesting an exchange will bear all related shipping costs.
- 2. Wrong Format.** If you have questions regarding software quality or format, please contact us toll free at 1-888-893-7464 before placing your order. It is your responsibility to make sure you have the correct player for the disc you purchase.
- 3. Defective software.** We will exchange your defective/opened item for another copy of the same item. Up to \$5.00 return shipping costs will be credited if the return is due to a defect in the software. We recommend that you send your return via an insured carrier. We are not responsible for lost returns.
- 4. Incorrect software.** If you receive incorrect software due to our mistake, contact us immediately. Please return the item unopened, we will send you a replacement or issue a full refund. If you paid for Next Day Air, 2nd day or 3 Day select, Ace Karaoke will only refund up to \$10.00 of the shipping cost. If you inadvertently opened the incorrect software, please return the item and we will send you the correct software. We will credit up to \$5.00 for software returns if Ace Karaoke sends you a product in error or if it is defective. You will not be charged any additional shipping and handling fees for replacement shipments. Your replacement will be shipped using the same method you initially selected. Please contact us and our customer service department will assist you with your issue.
- 5. Cracked damage CD Jewel Case.** If a CD case arrives cracked or damage, please contact us. Our customer service department will be happy to mail you a replacement case.

### Beyond the 14 day Coverage Period

If your purchase is beyond our 14 day coverage period for defective hardware, please contact the manufacturer. We can assist you in getting in contact with the manufacture for service work if needed. Ace Karaoke is not responsible for any fees related to shipping costs, repairs, exchanges or refunds.
